## About me

Hi everyone, I am a PHP Software Engineer with a focus on Corporate Software Development. I have been working in this field since 2018 and have gained a wealth of experience in developing robust and scalable applications.

My technology stack includes PHP 7.4+, MySQL, Javascript, Typescript, and Vue 3. I am passionate about staying up-to-date with the latest advancements in technology and incorporating them into my work.

I am a detail-oriented and proactive team player who thrives in fast-paced environments. I enjoy working on complex projects and finding creative solutions to challenging problems.

If you're looking for a skilled PHP Software Engineer to join your team, feel free to reach out to me. I'd love to chat and see how I can contribute to your organization.

I have a solid English proficiency level of A2, which allows me to communicate in basic everyday situations with ease. Moreover, I possess a strong technical vocabulary that enables me to read technical books in English with comprehension. I am continuously improving my language skills by practicing and seeking new learning opportunities

## higher education

### Belarusian State University of Informatics and Radioelectronics

Sep 2015 - Sep 2019
